

cecchini collection / italy

The cecchini collection is an understated nod to classic modernism which defies trends. It's timeless design and spectacular quality combine to create pieces that mix well with just about any period. Many of the lines and shapes that the cecchini collection embraces owe their origins to Asian influences, a trend that is now emerging as an important part of modern Italian design. It is important to note however, that the Cecchini family has been inspired by this tradition for over a hundred years - for them - this is nothing new. Some companies follow trends. In the case of the Cecchini family - they quietly define them.

Using Zebrawood and lacquer as their primary materials, the cecchini collection is finely crafted based on a combination of old world techniques and proprietary technology resulting in pieces which are not only stunningly unique - they are impossible to reproduce. You will never see a cecchini piece copied or imitated in a manner which even comes close to the original. An investment in a piece of cecchini furniture is akin to an investment in a painting or a work of art. Now available for the first time ever in Canada, we invite you to see for yourself why the cecchini collection is truly worthy of the term "classic".
