

TIBERIO

TIBERIO
design Ferruccio Laviani

Series of containers, in various compositions, characterized by the thin base which underlines the upper frame. The Tiberio line is composed by 3 different types of surfaces, which all enhance the wooden décor in modern way: worked to "matelassé" effect or worked with "concentric frames" or just covered with wooden veneer. All types have the structure with 45° joints, the opening with pairs of hinged doors or folding door and/or drawers, the base in burnished brass and mat lacquered inner parts.
