PELLE NABUK Category "Leather Extra"

Water-repellent Nabuk offers a particularly soft "velvet touch" which is the result of a strict choice of raw materials and of the mild treatment during the production process. Imperfections, twilling, scratches, light/dark changes as well as possible marks are typical features of such natural leathers, highlighting the uniqueness of these full grain hides.

Description: Water-repellent Nabuk
Thickness: mm 1,1-1,3
Type of hide: bovine
Origin: European
Tanning: chrome
Dyeing: aniline

PELLE SANTIAGO Category "Leather Extra"

Handmade nabuk finishing enhances the uniqueness of each single hide. Imperfections, twilling, scratches, light/dark changes as well as possible marks are considered typical features of such natural leathers. Its special touch, with talc finish called "velvet touch", is obtained thanks to the use of specific pigment and superficial varnish free products.

Description: Nabuk, Natural grain
Thickness: mm 1.3-1.5
Type of hide: bovine
Origin: European
Tanning: chrome
Dyeing: aniline, in barrel

AUSTIN Category "Leather Extra"

A pure aniline leather with a characteristic non-homogenous look, given by some shades, which are due to the differences in absorption of the aniline in the dyeing barrel. The main feature of such hides is their natural touch, their gentleness and softness. All imperfections and light and dark variations in colour, wrinkles, superficial scratches in the grain or possible halos are a characteristic of the absolute naturalness of a leather of the utmost quality.

Description: aniline full grain
Thickness: mm. 1,0/1,2
Type of hide: bovine
Origin: European
Tanning: chrome
Dyeing: through-dyeing aniline
Finishing: Aniline
Look: mat
